

# GfH-Kurznachrichten

## gfh-genetalks-online

Mittwoch, den **21.7.2021** ab 18:00 Uhr findet zum vierten Mal unser „gfh-genetalks-online“ statt – kostenlos – via Zoom-Meeting.

### **Prof. Dr. Hildegard Büning: Gene Therapy – Status and Future Direction**

As indicated by the 10 market approvals in the Western World, gene therapy has reached the clinical reality. Instead of treating symptoms, gene therapy offers the chance to cure a genetic disease by providing a function gene copy, by counteracting the activity of a malfunctioning gene or – with the advent of genome editing – by repairing the underlying genetic mutation. The range of applications was greatly expanded and currently encompass monogenetic diseases, cancer, and infectious diseases. Despite this success, the full potential of gene therapy has not been fully unlocked so far. Current challenges as well as strategies followed to tackle these challenges will be discussed.
